Homeownership & Living with Parents
Compared to Baby Boomers and Gen Xers, Millennial Homeownership rate is 7-8 percentage lower.

If the homeownership rate for millennials had stayed the same as previous generations, there would be about 2.4 million more young homeowners (age: 25-34) today.

Homeownership Rate (Heads 25-34)

Source: Decennial Census & American Community Survey
The share of young adults living with their parents has increased from 12 to 22% between 2000 and 2017, adding about 5.1 million more young adults living under their parent’s roof.

Source: Decennial Census & American Community Survey
Black millennials have the lowest homeownership rate (15.3% in 2017).

The black-white millennial homeownership gap increased from 25.7% in 2000 to 31.9% in 2017.

Why are Millennials Owning Less and Living with Their Parents More?
Are Millennials Different?

Shift in Preferences

• Multiple surveys find that millennials have strong desire to pursue homeownership.
• Many millennials prefer living in high cost cities and core urban areas, where housing is relatively expensive.

△ Demographic/Socioeconomic Characteristics

• Millennials are more racially and ethnically diverse, and the people of color have lower homeownership rate than whites.
• Millennials delay marriage (and child birth). Only 40 percent of Millennials ages 25 and 34 were married in 2017, a substantial decrease from almost 60 percent in 1990.
Do They Face Greater Barriers?

Employment & Income

• Young adult’s unemployment rate shot up to 10% in 2010. However, the unemployment rate fell to 4% by 2019 Q1.

Student Debt

• The average student debt of young adults ages 25 and 34 increased from $4,346 in 2001 to $17,120 in 2016.

Limited Housing Supply

• The number of new housing starts in 2018 is lower than that of the 1960s, when the U.S. population is only about 55 percent of what it is today.

Tight Credit

• The median credit score for mortgages at origination was 736 in April 2019 —higher than the median of 692 in 2000, a period of reasonable lending standards.
What are the Long-Term Consequences?
Young adults who stayed with their parents at ages 25-34 are less likely to be heads and homeowners 10 years after.

Impact on Future Generations

- Parental Wealth and Homeownership explains **12%** of the black-white young adults’ homeownership gap.
  - Children of homeowner parents are **4-5** percentage points more likely to be homeowners, all else equal. A 10 percent increase in parental wealth increases child’s likelihood of owning by **0.15-0.20** percentage points.

**WHY IT MATTERS**

---

**Graph 1:**
- **Child Homeownership by Parent Ownership**
  - Parent: Renters: 14.4%  
  - Parent: Owners: 31.7%

**Graph 2:**
- **Child Homeownership by Parent Wealth**
  - Wealth <$10,000: 14.1%  
  - $10,000 ≤ Wealth <$50,000: 19.1%  
  - $50,000 ≤ Wealth <$150,000: 29.7%  
  - $150,000 ≤ Wealth <$300,000: 31.8%  
  - Wealth ≥ $300,000: 36.4%
